Company Overview

Sharon AI is an Australian-based Neocloud infrastructure provider delivering GPU cloud infrastructure for artificial intelligence workloads. The Company enables enterprises, hyperscalers, governments, and AI developers to train and run AI models by providing access to high-performance NVIDIA GPUs through GPU - as-a-Service (GPUaaS), eliminating the need for customers to purchase hardware or build data centers.

Positioned as Australia's leading sovereign AI infrastructure platform, Sharon AI is building scalable "AI factory" capacity to serve the rapidly growing demand for AI compute across Australia and the broader Asia-Pacific region. The Company's infrastructure buildout is supported by strategic partners including NVIDIA, Cisco, World Wide Technology (WWT) and NEXTDC, with a planned deployment pathway of up to 54MW of GPU capacity in 2026. Sharon AI generates revenue through multi-year enterprise contracts—typically three to five years in duration—providing strong revenue visibility and scalable recurring cash flows as additional GPU capacity is deployed.

Investment Highlights

Australia's Leading Sovereign AI Infrastructure Platform

- Sharon AI is positioned as Australia's leading Neocloud, delivering AI-native GPU infrastructure for enterprises, governments & regulated industries requiring secure, hosted AI compute.
- With strong subsea connectivity and abundant energy resources, Australia is uniquely positioned to become a net exporter of AI compute ("tokens") into the Asia-Pacific region.

Credible AI Factory Buildout with Near-Term 54MW Capacity Pathway

- Sharon AI is executing a scalable AI factory deployment strategy, targeting 54MW of GPU capacity in 2026.
- Capacity is supported through a strategic partnership with NEXTDC, Australia's leading listed data center operator with 17 data centers, ~417MW of contracted capacity, and a 3.5GW+ development pipeline.
- The Company follows a customer-led deployment model, securing enterprise contracts before deploying compute infrastructure to support long-term utilization.

Blue-Chip Technology Ecosystem Validates Platform

- Certified NVIDIA Cloud Partner (NCP) — one of only three in Australia — enabling Sharon AI to deploy GPU infrastructure built on NVIDIA reference architectures.
- Strategic partnership with Cisco to launch enterprise-grade Secure AI Factory solutions powered by NVIDIA GPUs.
- Australia's first Cisco Secure AI Factory launched in February 2026 at NEXTDC's S3 Sydney facility, featuring 1,024 NVIDIA Blackwell Ultra GPUs.

- World Wide Technology (WWT) serves as Sharon AI's exclusive APAC integrator & NVIDIA's #1 global partner for 10 consecutive years, supporting infrastructure deployment at scale.
- Infrastructure deployments are hosted within NEXTDC's enterprise-grade facilities, providing secure, high-performance data center environments.

Lighthouse Enterprise Customer Validation

- Sharon AI's AI-native infrastructure delivered significantly improved networking performance gains using NVIDIA Spectrum-X and BlueField technologies, accelerating AI training & inference workloads.
- VAST data storage architecture delivered very material performance improvement over competing solutions, enabling significantly larger data volumes with linear scaling across compute nodes.

Institutional Investor Validation

- Shareholder base includes leading institutional investors including Oaktree Capital Management and Two Seas Capital.

Strategic Partners

Sharon AI is a certified **NVIDIA Cloud Partner**, operating GPU clusters built on **NVIDIA Reference Architectures** to support scalable AI training and inference workloads.

Sharon AI has partnered with **NEXTDC** to **build Australia's Sovereign High Performance AI Infrastructure**. NEXTDC has 17 Data Centers, 412MWs of contracted utilisation and a 3GW+ Development Pipeline.

Sharon AI has **Partnered with Cisco** for **Managed Enterprise Cloud AI Solutions** to accelerate and expand Enterprise go-to-market sales opportunities in Asia-Pacific.

An **Elite NVIDIA AI Partner, WWT has partnered with Sharon AI** to provide digital strategy, innovative technology, and supply chain solutions for larges-scale HPC/AI infrastructure deployment.

Value Proposition

Sharon AI is emerging as a differentiated AI infrastructure platform positioned at the intersection of sovereign cloud computing and the global buildout of AI compute capacity. As hyperscalers, enterprises, governments and start-ups rapidly expand their use of AI, demand for high-performance GPU infrastructure is accelerating worldwide, creating a new class of providers known as "Neoclouds" that deliver specialized AI compute outside of traditional hyperscale platforms. With a strategy focused on AI-native GPU infrastructure, sovereign data hosting, and enterprise-grade performance, Sharon AI is positioning itself as Australia's leading Neocloud and a key supplier of AI compute capacity across the Asia-Pacific region.

The Company's infrastructure strategy is built around a scalable AI factory deployment model, supported by strategic partnerships with NVIDIA, Cisco, World Wide Technology, and NEXTDC. Through these relationships, Sharon AI has secured a pathway to deploy up to 54MWs of GPU capacity in 2026, providing the foundation for a substantial increase in compute supply at a time when global AI infrastructure remains supply constrained. Sharon AI's model is customer-led and contract-driven, with multi-year enterprise agreements typically spanning three to five years, providing visibility into future revenue while allowing the Company to scale capacity alongside demand.

Sharon AI's geographic positioning further strengthens its long-term opportunity. Australia is one of the world's most attractive jurisdictions for advanced AI infrastructure due to its stable regulatory environment and strong energy resources. Combined with robust subsea connectivity across the Asia-Pacific region, these advantages position Australia to become a net exporter of AI compute into Asia, where demand for GPU capacity is accelerating but local infrastructure remains constrained. Sharon AI is strategically building infrastructure to capture this emerging regional opportunity.

The Company's early commercial traction and strategic ecosystem provide additional validation of the platform. Partnerships with industry leaders including NVIDIA, Cisco, WWT, and NEXTDC provide access to advanced GPU technology, enterprise distribution channels, and proven infrastructure deployment capabilities. The launch of Australia's first Cisco Secure AI Factory demonstrates both the technical performance and commercial viability of Sharon AI's AI-native infrastructure platform.

From an economic perspective, the GPU cloud model offers substantial operating leverage as capacity scales. As additional compute capacity is deployed and utilization increases, Sharon AI's infrastructure platform has the potential to generate significant recurring revenue growth.

Taken together, Sharon AI represents an early-stage platform positioned to benefit from several powerful structural trends: the global surge in AI infrastructure demand, the emergence of sovereign AI compute environments, and the rapid growth of Neocloud providers serving enterprise AI workloads. With a credible capacity buildout plan, blue-chip technology partnerships, growing enterprise adoption, and a large regional market opportunity, Sharon AI offers investors exposure to one of the fastest-growing segments of the global AI infrastructure ecosystem.
