Company Overview

Hawkeye Digital is creating a differentiated merchant banking and private equity platform designed to capitalize on the institutionalization of digital assets. Leveraging deep capital markets expertise and an established global network across blockchain and crypto, the Company identifies, acquires, and incubates high-potential businesses while providing investors with diversified exposure to one of the fastest-growing segments of global finance.

Investment Highlights

Positioned at the intersection of digital assets and traditional capital markets

- Building a differentiated platform that combines merchant banking, private equity, and strategic advisory services focused on the digital asset ecosystem.
- Positioned to capitalize on the growing institutional adoption of blockchain technologies as digital assets increasingly integrate with traditional financial markets.
- Led by seasoned capital markets executives and digital asset industry veterans with complementary expertise spanning Wall Street and crypto.

Deep industry relationships drive proprietary deal flow

- Hawkeye President David Wachsman founded Wachsman—one of the blockchain and digital asset industry's leading strategic communications and advisory firms—in 2015, helping establish one of the sector's deepest global relationship networks.
- Over the past decade, Wachsman has advised many of the industry's most prominent companies, including Ripple, Circle, Tether, Binance, OKX, Solana Foundation, and ConsenSys, building deep relationships across the global digital asset ecosystem.
- Longstanding industry relationships and proprietary sourcing capabilities create a competitive advantage that is difficult for traditional private equity firms and investment banks to replicate.

Multiple complementary value creation opportunities

- Merchant banking engagements generate advisory fees while creating opportunities to establish strategic relationships, acquire minority equity positions, and identify future private equity acquisition targets.
- Private equity investments target mature, cash-generating digital asset businesses capable of creating long-term shareholder value.
- Integrated model creates a powerful value creation flywheel, generating proprietary deal flow for strategic investments and future acquisitions.
- Multiple potential monetization pathways—including strategic sales, public listings, and long-term ownership—provide flexibility for value realization.

Executing a clear path toward a national exchange uplisting

- National exchange listing is expected to significantly expand investor awareness, trading liquidity, and institutional ownership opportunities.
- Enhanced access to the public capital markets is expected to support Hawkeye's long-term acquisition strategy and accelerate platform growth.
- ThinkEquity has invested in Hawkeye and serves as the Company's financial advisor.

Experienced leadership with proven capital markets expertise

- Executive team combines decades of public company leadership, capital raising, M&A, and public market experience with deep digital asset industry knowledge.
- Leadership has extensive experience helping companies access public markets, execute strategic transactions, and build long-term shareholder value.
- Management's complementary backgrounds position Hawkeye to bridge the operational and financial needs of emerging digital asset businesses.

Value Proposition

Hawkeye Digital is building what management believes could become one of the first publicly traded merchant banking and private equity platforms dedicated to the rapidly institutionalizing digital asset economy. According to Boston Consulting Group, tokenized real-world assets could grow into a \$14 trillion market by 2030, highlighting the enormous opportunity as blockchain technology reshapes global finance.

What differentiates Hawkeye is its access to proprietary deal flow. Led by President David Wachsman, founder of one of the blockchain and digital asset industry's leading strategic communications and advisory firms, the Company is uniquely positioned to leverage one of the sector's deepest relationship networks.

Over the past decade, Wachsman has advised many of the industry's most influential companies—including Ripple, Circle, Tether, Binance, OKX, Solana Foundation, and ConsenSys—while developing deep relationships with founders, venture capital firms, exchanges, and the premier conferences that shape the digital asset industry. Those relationships provide Hawkeye with proprietary access to an unrivaled pipeline of merchant banking, strategic investment, and acquisition opportunities.

Unlike companies whose performance depends on the price of digital assets, Hawkeye is building a platform to monetize the growth of the entire digital asset ecosystem. By integrating merchant banking with private equity, the Company has created a powerful value creation flywheel that generates a continuous pipeline of proprietary investment opportunities, positioning Hawkeye to capitalize on the accelerating institutional adoption of blockchain technologies.

Business Model

Hawkeye operates an integrated platform designed to generate recurring revenue while building long-term equity value throughout the digital asset ecosystem.

Merchant Banking

- Strategic advisory, capital markets, and M&A services
- Generates recurring advisory fees and minority equity positions

Private Equity

- Acquires controlling interests in mature digital asset businesses
- Creates long-term portfolio value through operational growth and strategic exits

Competitive Advantage

- Proprietary deal flow sourced through one of the industry's largest relationship networks
- Ability to leverage merchant banking relationships into future acquisition opportunities
