Strengthening American Supply Chains for Critical Minerals

Company Overview

NioCorp Developments is developing the Elk Creek Critical Minerals Project in Nebraska, a U.S. source of niobium, scandium, titanium, and magnetic rare earth elements essential to advanced manufacturing and national security. The Project has received \$10 million in Pentagon funding and is under active consideration by the U.S. Export-Import Bank for up to \$780 million in potential project financing.

Elk Creek is designed to supply materials central to modern defense, aerospace, robotics, AI, and energy technologies while reducing America's reliance on foreign sources. NioCorp has also partnered with Lockheed Martin and its Skunk Works® division on a new Pentagon-funded defense technology program developing aluminum-scandium alloy components for next-generation fighter aircraft. As NioCorp advances toward construction, the company is positioned to become a cornerstone of America's effort to secure a reliable, long-term supply of critical minerals that strengthen U.S. manufacturing and defense independence.

Investment Highlights

Construction-ready U.S. critical minerals project

- All major permits for a construction start secured; no public lands impacted, and a very small environmental footprint
- Underground mine and above-ground processing facility expected to generate revenue 36 months after construction start
- Recently launched its \$45 million Mine Portal Project to establish primary underground mine access

One of America's largest critical mineral resources

- Highest-grade niobium project under development in North America
- Largest indicated U.S. terbium resource, 2nd largest dysprosium resource, and 2nd largest Neodymium-Praseodymium resource

Locked-in offtake agreements with tier-one customers and strategic partners

- 75% of planned niobium output under 10-year offtake contracts with Thyssenkrupp and Traxys North America
- Largest scandium sales deal on record with Traxys North America
- Partnership with Lockheed Martin and Skunk Works® on a Pentagon-funded scandium defense technology program

Strong financial position with rapidly advancing project financing and federal government support

- \$370.8M raised in 2025 with no long-term debt on balance sheet
- Pentagon grant of up to \$10M to establish the first domestic scandium mine-to-markets supply chain
- U.S. Export-Import Bank processing application for \$780M in debt financing

Led by a proven rare earths and mining team

- CEO Mark A. Smith formerly led Molycorp and Largo, Inc.; COO Scott Honan brings 30+ years of mining and mineral processing experience

Buy recommendations: Maxim, William Blair and HCW; average PT range \$11.00 – 15.00 per share
